

Archival Research Visitor Programme proposals review

Guido De Marchi

ESDC Head Scientist

10/5/2022

- 18 applications
- Astronomy is the majority, 10/18
- Most applications for 3 big observatories
- Ladies only 22% of applicants, unexpected!
We must be more proactive and specifically encourage female PhD students and postdocs.
- ESAC preferred for astronomy,
ESTEC for solar system physics
(but small number statistics...)

- 3 June: review deadline
- 6 June: Preliminary shortlist ready
- week of 6 June: discussion (telecon/email) to agree on recommendations to
ESA Management
- 20 June: decision by ESA Management
- 20 June: “winners” notified informally
- Early July: outcome announced via ESA Science Communication channels.
Should we bring this forward to 28 June, EAS Meeting session?
