

# Plans for lunch session at EAS Annual Meeting

---

Guido De Marchi

ESDC Head Scientist

10/5/2022

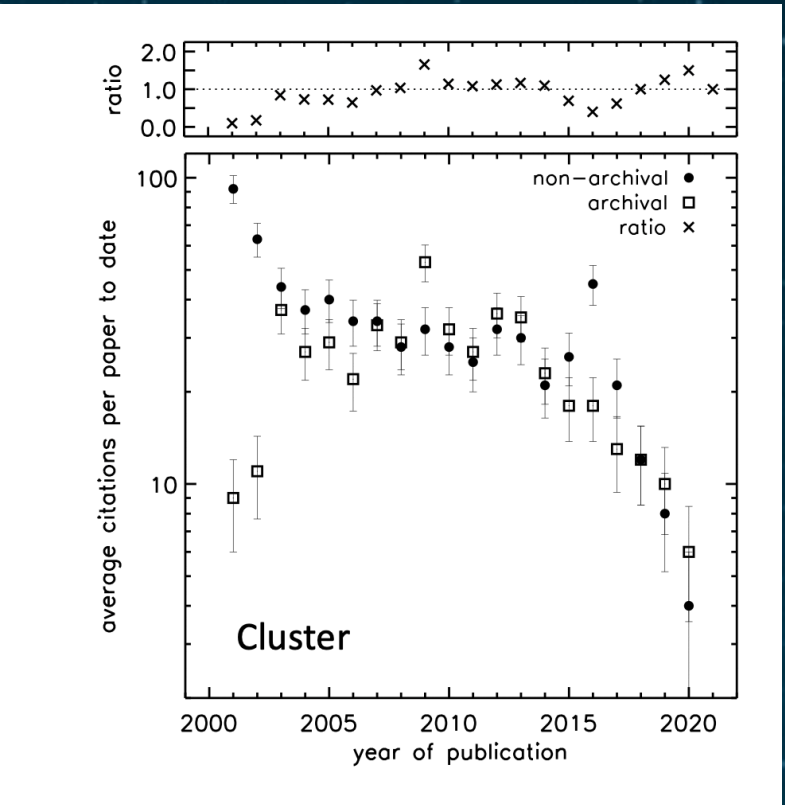

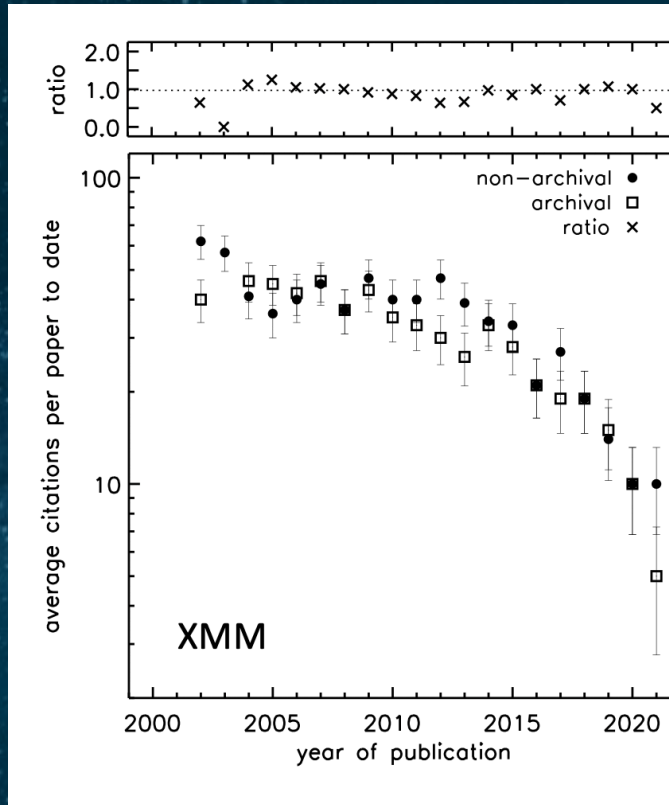

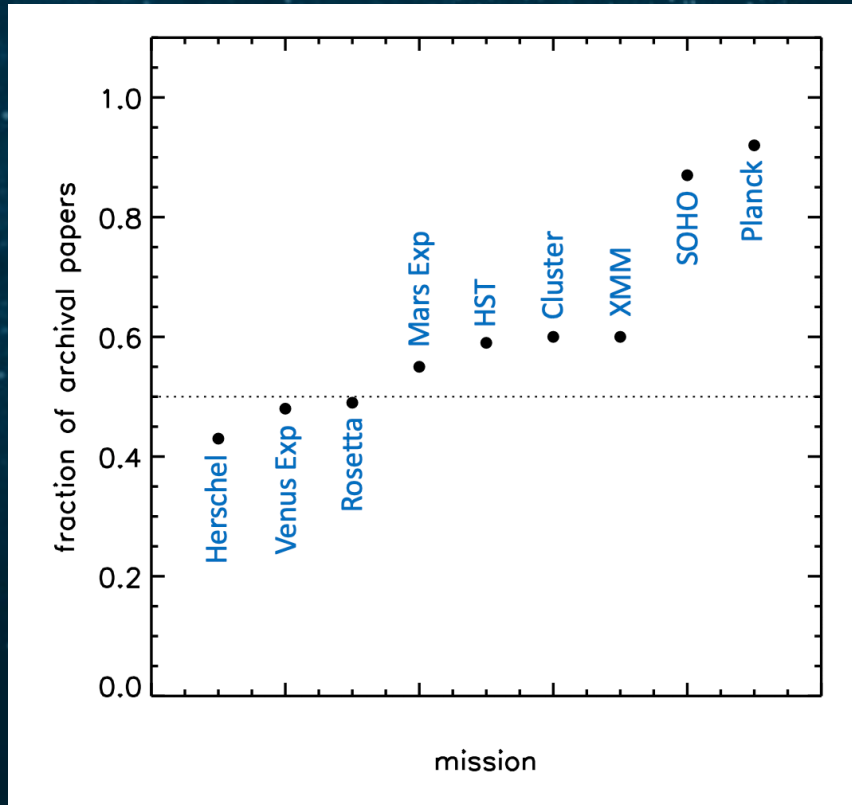

- Tuesday 28 June, 13.15 – 14.45
- Room big enough to host 120 people
- (previous events: in person ~70 people, online ~100 people)
- Meeting fully in person, no online/hybrid sessions
- Some presentations, updates, and demos
- Big chunk of time for questions and answers (~30 min)

- Bruno Merin: Welcome (2 min)
- Guido De Marchi: Archives as source of scientific discoveries, impact of archival papers, Archival Research Visitor Programme results (10 min)
- Natalie Webb: Astronomy Archives User Group, role of community scientists in shaping how ESA's data are presented, promoted, and preserved (10 min)
- Deborah Baines: update on ESASky, and specific demos, highlight of multi-messenger astronomy (15 min)
- Marcos Lopez-Caniego: ESA Datalabs update and demo, specific to JWST data arriving in July (20 min)
- All AAUG members: panel discussion (30 min)

# Archival papers impact

Archival papers are the majority...

and are cited as frequently...

in all areas of space science!

## What to show in the demos

- How to make it easier for people to follow along?
- Ask them to open browser in their laptop?
- Offer "science case" to solve?
- DataLabs: very powerful but will you get lost if you do not master Python?

## AAUG role and panel discussion

- How to best engage the community in the discussion?
- Questions on the spot, with poll (e.g. slido)?
- Poll about data and software immediately public (e.g. NASA/ERC) ?

- Who plans to attend the EAS Meeting?
- Available for Lunch Session?
- Interested in joining us at ESA booth?
- ...
