

Results of the SEM, XRD and ICP-MS Analysis From Some Meteorites in Turkey

Özcan ÇALIŞKAN

This paper firstly analysis the results of fallen meteorites of Turkey, meteorite which taken from other countries by swapping or donating to Turkey are provided together.

To amount of the material for analyzing the Meteorite samples have taken from Istanbul University, Ege University and MTA.

Meteorites on this poster have been visualized by SEM, identified their mineral structure by XRD and counted the constancy of picked elements by ICP-MS.

Their physical and chemical properties have given on the chart of the poster and they've been classified by the result of the analysis.

Keywords: Meteorite, Analysis of Meteorite, SEM, XRD, ICP-MS.
