

PV 2009

Ensuring Long Term Preservation
and Adding Value to Scientific and Technical Data

Concluding Remarks

Scientific and Technical Data are more than *JBOD (Just a Bunch Of Disks)* !

- How to organize, to curate and to describe all this data?
- How to keep this information easily accessible and useful for the future?
- How to bring added value to this data?
- What are the tools and applications enhancing its use and usefulness?
- How to share data easily and make it interoperable?
- What are the current modern techniques used to reach these goals?
- What will be the future ones?
- What are the lessons learnt from experience?
- How to put them in practice in the future?

- Many interesting talks, posters, discussions through the conference
- Practical experience, operational systems, “theoretical” studies, future prospects, ...
- Many disciplines have been covered
- All questions have been addressed
- May be not all have been fully answered 

Still some work until PV2011 and further ...

- Final PV2009 Programme will be updated on the web including
 - Presentations (PPT and PDF format)
 - Poster (PPT, please them to pv2009@sciops.esa.int)
 - Papers (PDF)

- Conference pictures to be uploaded on the PV2009 web
 - Please send them to pv2009@sciops.esa.int if you have nice ones

- Stay tuned :
 - <http://www.sciops.esa.int/index.php?project=CONFERENCE&page=pv2009>

- Asa Ericson for all the support enabling smooth logistics !
- Santa Martinez, Adolfo Vazquez for the registration process and IT aspects
- Pilar Garcia for all financial support
- Rod Bailey for all web support
- ESAC Sites Services and Canteen staff
- All POC members for the programme preparation and session chairing
- All speakers for the interesting talks and keeping the time !
- All of you for your attendance !
- Richard Moreno and CNES for taking up the organization of PV 2011 in Toulouse !

See you soon at ESAC or somewhere else !
