

ISWT and IUG:
Recommendation from the INTEGRAL Users Group

The termination of the core program after AO5 removes one of the key tasks of the ISWT. It was therefore agreed as best for INTEGRAL's operation as a gamma-ray platform for the science community to expand the UG and formally include the ISWT through their membership herein, to retain their expert knowledge in this now sole INTEGRAL science advisory body of ESA. The other tasks of the ISWT can be subsumed into the ground segment meetings. The IUG recommends acceptance of this proposal.
