

SMPAG – 06/02/2020 (UN-COPUOS #57)

Mirel Birlan, Alin Nedelcu

WP 5.9

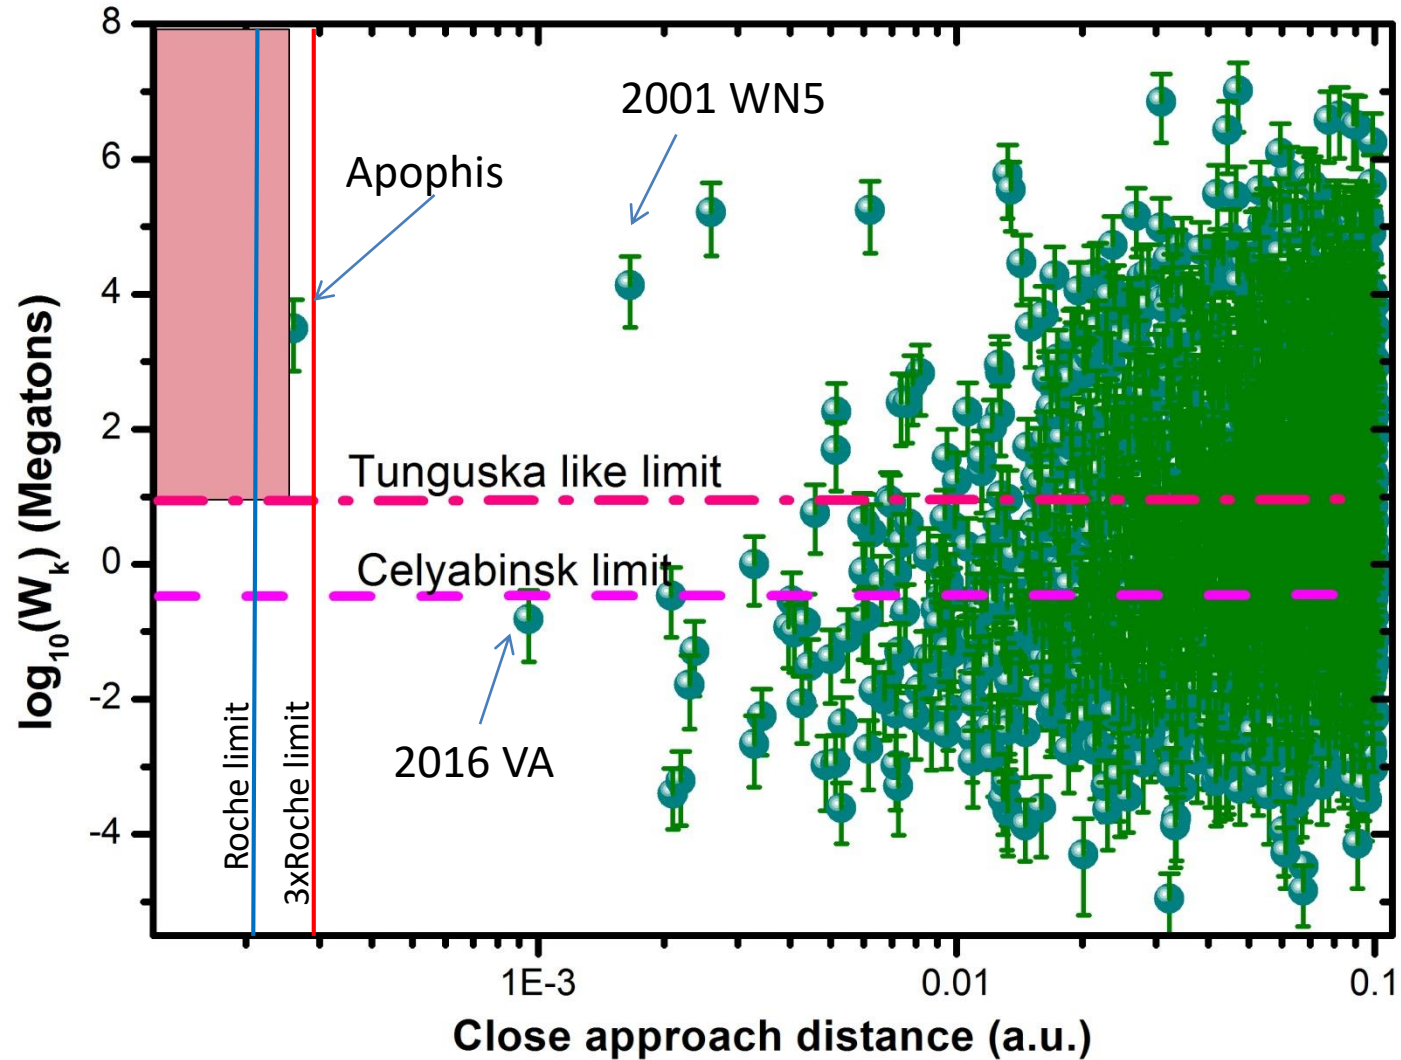

(Romanian Space Agency)

Correlation between graze and energy

- Compute the Minimal Orbital Intersection Distance for all NEAs 2020 – 2030 using January 2020 epoch.
- Estimate the energy interval using a density interval
- Consider the energy of 10 MT (Tunguska like as threshold and Chelyabinsk event)

Energy vs MOID

Time interval 2020-2030

Time interval 2020-2030
